288a Gloucester Road, Horfield, Bristol, BS7 8PD, United Kingdom

I'm a logic sculptor - dedicated to my art. I've been developing apps for mobile devices since 2005. I have excellent communication skills, a keen eye for detail, and an intuitive feel for making Android apps that are a pleasure to use. Originally from Silicon Valley I've been living in the UK since 1996.

### EXPERIENCE

#### Android Developer - Freelance

**Elroid Ltd** 2016 - Present

**Bristol, UK**

Freelance developer, working remotely and in the area of Bristol. Specialising in Android apps of all kinds, especially those involving location and map-based technologies.

#### Senior Developer

**Intohand Ltd** 2009 - 2016

**Bath, UK**

Lead programmer and development consultant using J2ME, Blackberry, Android, and PHP for over a dozen different clients. Established process standards and spearheaded JIRA-based project management. See [portfolio](#) for featured projects.

#### Co-Founder & CTO

**MyCityMate S.A.** 2005 - 2010

**Barcelona, Spain & Frankfurt, Germany**

Co-founded a technology startup and personally performed all design, specification, and implementation of J2ME-based mobile phone travel guide application and supporting website in three languages.

Solution involved customised recommendations for each user, including a weekly personalised email newsletter, and a custom mobile application that stored all information on-device for use offline while travelling. Attracted the attention of Lonely Planet, and our technology was used to release J2ME-based travel guides under the Lonely Planet brand.

#### Java/Web Developer

**Synchro Ltd** 2002 - 2004

**Birmingham, UK**

Performed java website development (using JSP with Struts, Flash, and Tomcat/MySQL) for web browser-based intranet planning application for construction projects. Also designed and built a new company web site.

## Java/Web Developer

**tw2 eCommerce Systems** 2000 - 2001

**Birmingham, UK**

Developed web application for a start-up online personalised printing firm with a team of developers. An Enterprise Java Beans based system, utilising JSP, Javascript, Java applets, Java beans and MS-SQL. Also developed a Java-based catalogue system for a large computer component reseller with a team of developers

## Network Engineer (Contract)

**International Computers Ltd.** Aug. - Dec. 1999

**Stevenage, UK**

Participated in UK-wide retail systems rollout for Marks and Spencer. Diagnosed, repaired, and upgraded faulty PCs. Set up workstations and servers to be included on an NT-based network.

## SKILLS

- Programming Languages: Android/Java (Expert), HTML/Javascript, PHP, Flash/Actionscript (Proficient)
- Spoken Languages: English (Fluent), Spanish (Fluent), German (Basic)

## EDUCATION

### BA Computer Science / Music

**University of Birmingham** 1996 - 1999

**Birmingham, UK**

Specialised in saxophone performance, computer music, and audio processing.

- Conductor, University Wind Band

## PORTFOLIO

### MindBeer

Pour the perfect beer using just your mind!

### Manoto

Iranian-language TV Production company based in London with over 1 million monthly users

### The LADbible

Covering humour and viral content galore, with over 100k downloads, the LADbible needs no introduction.

### Tribesports

Tribesports is a social fitness tracking app combining personal training plans with a real-time GPS tracker.

### etherbooks

A marketplace for short story content, an immersive eReader and the ability to follow your favourite authors.

### Judo Payments

JudoPay is the fast, safe and hassle-free way to pay using your phone at thousands of businesses across the UK.

### Glade Festival

My first effort at a music festival app, with the ability to see what's on now/next and be reminded when my favourite acts are about to perform.

### Vypr

Vypr lets consumers earn cash for participating in retail goods surveys

### Smart Driver Club

Smart Driver Club brings all the data about your vehicle to your fingertips, from diagnostics to location

### Lovestruck

Lovestruck® – Winner of Dating App of The Year at the UK Dating Awards 2014 with over 100k downloads.

### gigit

Created with concert photography in mind, gigit provides a route-to-market for photographers, with real-time delivery of concert photos.

### MeetApp

Send your location to anyone, no matter what platform they use, including when connectivity is scarce.

### Boomtown Festival

My vision of what a festival app should be, with real-time data, GPS, augmented reality, search, and reminders, all available without connectivity.

### Squash My Car

A fun little app that turns your car into a micro machine.
